339-368-0897 | tifny7574@gmail.com | <https://www.linkedin.com/in/ittseng> | <https://ittseng.co/>

Product Designer with 6+ years of experience driving product decisions in complex, data-heavy, and trust-critical systems. Proven track record of leading end-to-end product strategy and design to improve decision quality, operational efficiency, and user outcomes. Experienced in partnering with cross-functional teams to translate ambiguous problems into scalable, high-impact solutions.

EXPERIENCE

MH Sub I, LLC dba Internet Brands

Remote / New York, NY

Product Designer (formerly Associate Product Manager)

June 2021 – September 2025

- Drove product strategy and redesign of the roommate matching experience, shifting from a listing-based to a trust-driven system, increasing engagement and achieving ~4% conversion (~50% of theoretical maximum)
- Owned the design and decision framework for a data-driven review filtering system, reducing monthly abuse tickets by 30–50% and improving moderation efficiency at scale
- Led experimentation strategy and A/B testing across user flows, identifying a higher-performing experience (+11% CTR) and driving product-wide rollout
- Defined product strategy and led implementation of a cross-module notification system, prioritizing high-signal events and improving response time across enterprise workflows
- Owned onboarding improvements including “Sign up with Apple,” increasing new user registrations by ~4% (~4,000/month)

EMCT Inc.,

Taipei, Taiwan

Product Designer

May 2013 – July 2018

- Led end-to-end design of a large-scale data visualization platform integrating 45+ data sources, enabling government stakeholders to interpret complex information and make informed decisions
- Owned UX strategy across 17 web and 11 mobile products, improving usability, adoption, and cross-platform consistency
- Drove redesign of a public-facing mobile application, increasing ratings from 3.0 to 4.4 and scaling active users from 10K to 360K
- Contributed to foundational design systems and interaction patterns, improving scalability and development efficiency across products

PROJECTS — AI & DECISION SYSTEMS

Verdict AI — Hybrid Moderation System

Personal Project (Based on real-world moderation experience)

October 2025 – Present

- Designed and led development of a hybrid AI moderation system combining rule-based logic and contextual signals to support high-stakes decision-making under uncertainty
- Defined an evidence-first decision framework, improving consistency, explainability, and reviewer alignment in complex moderation workflows
- Built an interactive prototype (Streamlit) to simulate decision logic and user interaction, enabling rapid iteration on system behavior and UX

ADDITIONAL

- Award: Winner, AT&T FirstNet Hackathon; Seed & Progress Round Winner, Tech to Protect Challenge
- Certification: PMI Certified Professional in Managing AI (PMI-CPMAI)™ (2025–2028)
- Skills:
 - **Product Design & Strategy** — Human-Centered Design, Product Thinking, UX Strategy, Interaction Design, Information Architecture, Journey Mapping, Wireframing, Prototyping.
 - **Research & Data** — User Research, Usability Testing, Data-Informed Design, Analytics (GA, GTM), Designing for Data-Heavy & Regulated Systems.
 - **Collaboration & Communication** — Cross-Functional Collaboration, Stakeholder Alignment, Design Facilitation, Design Storytelling, Agile / Lean UX. **Systems & Technical** — Design Systems, Scalable UX, Accessibility, Technical Constraints Translation.
 - **Tools** — Figma, FigJam, Adobe Creative Suite, Miro, Jira, Confluence

EDUCATION

M.S. Human-Computer Interaction—Indiana University (2020)

B.S. Geography—National Taiwan University (2009)
